

WILDERHILL NEW ENERGY GLOBAL INNOVATION INDEX (NEX)

The NEX is a global index of 88 companies listed on 25 exchanges in 21 countries whose innovative technologies and services focus on the generation and use of cleaner energy, conservation, efficiency and the advancement of renewable energy in general.

The NEX Universe

Companies worldwide active in wind, solar, biofuels, hydro, wave and tidal, geothermal and other renewable energy businesses, as well as energy conversion, storage, conservation, efficiency, materials, pollution control, emerging hydrogen and fuel cells. 45 industry analysts are researching the NEX Index Components

Index Methodology

NEX is a rule-based index and uses equal-weighting methodology modified by sector and market capitalization bands to provide diversification across the clean energy industry. The index is rebalanced quarterly on the last business day of March, June, September and December, when the components and the initial weights are determined. At rebalancing no single component can exceed 5% weight.

Eligibility Criteria for Index Constituents

- Listed on a national exchange or primary listing market
- Three-month average market capitalization of at least \$100 million and significant daily trading volume
- At least 50% of the stocks outside the U.S.
- Bias to pure plays

Index Calculation and Dissemination

The NEX is calculated by Dow Jones Indexes. The NEX closing values will be calculated on a 24-hour day that will end at 5:30 PM New York time. The end-of-day index calculations will use WM closing spot exchange rates as of 4 PM London time and each component stock's closing price on its primary market.

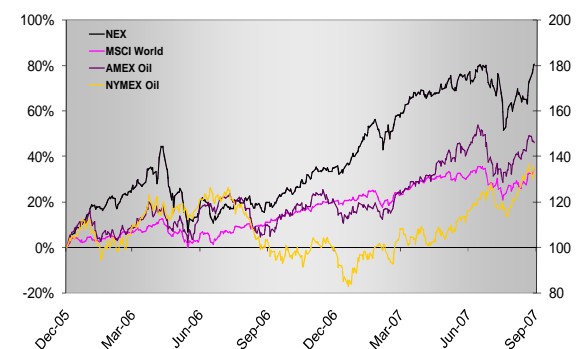

Index Tickers				
Tickers	USD	EUR	GBP	JPY
Price Return (every 15 seconds)	NEX	NEXEU	NEXBP	NEXJY
Total Return (summary only)	NEXUST	NEXEUT	NEXBPT	NEXJYT
